

AND SUCCEED

The method of non-violent resistance has already succeeded.

In India it succeeded in the struggle against colonial rule.

In Norway during the war it succeeded when the teachers prevented the introduction of a Nazi system in the schools.

In the United States today it is succeeding in the struggle against racial discrimination.

In Britain too it can succeed. It needs only the mass support of the people in a mounting campaign to bring the preparations for nuclear war to a halt. Every success, every act of resistance triggers off further non-violent action in other countries and makes world-wide disarmament possible.

Will you help in whatever way you can ?

NOTE TO USAF PERSONNEL

We are not anti-American. We are not saying : Go home Yank.

If there were Russian bases in this country we would protest at them. We have demonstrated many times at the Russian Embassy against nuclear tests.

We are demonstrating against the nuclear policies of our own Government.

You are a vital part of the war machine. Any day you may be ordered to destroy millions of people. Are you prepared to do this ?

We appeal to you now to reconsider your position.

MASS RESISTANCE

**SATURDAY
DECEMBER 9**

Committee of 100

13 Goodwin Street
London, N.4. ARC 1239

WHY IN A

because the statesmen of East and West are prepared to go to war, nuclear war. They admit that millions would die. They know that there might be no survivors.

they admit that tests kill and are a danger to the health of future generations. Yet they are prepared to go on testing.

WE SIT DOWN

because this form of non-violent protest directly challenges the Government's preparations for war and expresses our determination to resist even at the risk of imprisonment.

in London at the centre of Government because it is the Government that plans war in our name.

at the bases because it is at these bases that the buttons will be pressed, the rockets fired, the bombers dispatched.

in the towns throughout the country because it is these towns that will be wrecked and burnt. We want their inhabitants to know the peril.

DEMOCRACY

they know that war could come by accident. Several times already the bombers have been recalled only at the last moment. Leading scientists have warned that accidental war is not only possible but likely. But nothing is done. Rockets and bombers are on the alert. Continually.

WE RESIST

because we value freedom

democracy means nothing without freedom. This means above all freedom to live.

Hitler's slaughter of Jews could never have been democratic.

the preparations by Macmillan, Kennedy and Krushchev to kill millions of people can never be democratic.

the victims of nuclear war will not be consulted.

because we have responsibility

the German people have been blamed for not resisting Hitler's policies.

if we are to resist the policies of race murder we must act now. We must not say with Eichmann I am not responsible.
